

# MOF001 KC 2.25HP PRECISION ROUTER

## Features & Benefits

- Triton has now made it possible for bit changing & depth adjustments from above the table by introducing a portable height adjustment crank.
- The 2 ¼ HP Router boasts all the features of it's big brother (Triton 3 1/4HP Router) including; winder handle for single handed, accurate and fast plunge depth adjustments, shaft lock for changing bits with switch lock-out to prevent accidental starting, a micro adjuster for even more precise depth adjustments, variable speed control, soft start and quick change from free plunge to "rack & pinion" plunge mode.
- Triton has also made it easier to store and travel the router kit. The unit comes in its own carrying case with the height adjustment crank and a full 7 piece template guide kit, a complete ½" & ¼" collet set, a full featured fence with circle cutting option and a heavy duty collet wrench.
