

TC9BJM TRITON BISCUIT JOINER

Features & Benefits

- Powerful 9.0 Amp motor with 10,000 RPM provides the power and speed to cut into the hardest wood
- Adjustable fence with 0° to 90° tilt adjustment provides ease of use and greater versatility allowing slots to be cut on a bevelled edge
- Adjustable fence height from 0 to 1 3/8 Inch provides a stable and accurate surface allowing the placing of matching slots in the workpiece
- Pre set depth stops at #0, #10, #20 & Max for quick and easy adjustment to common biscuit sizes
- Full rubber grip over-mould handle provides extensive rubber grip area for a more positive grip, reduced vibration and greater comfort and control
- Unique slim handle design improves user comfort and provides greater control
- Adjustable front handle allows the handle to be positioned to suit the operator and application for more flexible operation
- Compatible with #0, #10 and #20 size biscuits, maximum setting allows oversized slots to be cut
- Spindle lock button allows quick and easy blade change
- Built-in dust extraction with dust bag for a cleaner and safer working environment
- Lock-on switch allows continuous operation without the need to keep the trigger switch depressed
